

wifi Investigator®

See Wi-Fi the way we do...

Passively identify...

...Wi-Fi enabled devices in real-time, without broadcasting or probing

Assess in real-time...

...device security configurations and data transfer statistics

Quickly locate...

... devices with a high degree of assurance and at a stand-off distance

WiFi Investigator® advantages:

- Utilizes GPS, compass, and signal strength data
- Completely passive - does not broadcast or probe
- Full support for 2.4GHz & 5GHz frequencies
- Listens to 802.11 a/b/g/n bands and their channels
- Capable of packet collection (disabled by default)
- Real-time and Post mortem analysis
- Geographically plot data within popular mapping apps
- Precision accuracy utilizing AIS's patented technology*
- Supports war-driving
- Customizable reporting
- Non-proprietary data export format
- Field Accessory Kit contains:
 - Complete war-drive assembly
 - Additional power options

Specifically designed to support:

Law enforcement investigations

Military and intelligence operations

Network and Information Security

Regulatory and policy compliance
